From the Detroit Belladouna in Startet Perer.

As the Searlet Faver has and does now revail to a very great extent in our Chy, I deem it a duty to make known a sure preventive, if taken in time, together with the repeated trials made by pathic physicians, as reported by Dr. Condie in the third American edition of Dr. Thomas Watson's Practice.

Dr. Condie says the question in relation to the prophylactis properties of Bel-ladonna in this disease is a highly interesting one. The severe and fata chare eoccurs as an epidemic, renders every of manufacturing, on an extensive scale, lege of having passed from house to house The statement continues: means of prevention that can be de end ed upon with any degree of certain ty, of attack of Scarlatina, we have some very strong and respectable testimotay.

OXYGENATED BITTERS

The annexed statement of Prof. A. A. HAYS, M. D., State Assayer, is ample testimony of the scientific manner in which this medicine is compounded, and recommends it to professional page, as well.

An opinion being asked for, of me, in consequent of the formula for proporting Oxygenated Bitters b-ing known to me, I express the following, in form: The composition of these Bitters includes thou medicinal substances which experienced physicians have long resorted to for special action on the system, when duranged by Fevers, Dyspensia, Ague and General Debility, resulting from exposure or elimate

These are rendered permanent, and remain active It was a well founded inference, that the preparation, used in larger or smaller doses, would prove a valuable General Medicine, which experience has onstruted. In this medicine, no metalic salts can be found, by

the most delicate chemical trial. Respectfully, A. A. HAYES, M. D., Assayer of the State of Massachusetts. Western Agent, JOHN D. PARK, Cincinnati, Ohio
